Further, statements that include words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "might," "present," "preserve," "project," "pursue," "will," or "would," or the negative of these words or other words or expressions of similar meaning may identify forward-looking statements.

Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include without limitation:

- we may be unable to successfully develop new games;
- our ability to compete in a highly competitive industry with low barriers to entry;
- we have significant indebtedness and are subject to the obligations and restrictive covenants under our debt instruments;
- the impact of the COVID-19 pandemic on our business and the economy as a whole;
- our controlled company status;
- legal or regulatory restrictions or proceedings could adversely impact our business and limit the growth of our operations;
- risks related to our international operations and ownership, including our significant operations in Israel, Ukraine and Belarus and the fact that our controlling stockholder is a Chinese-owned company;
- our reliance on key personnel;
- security breaches or other disruptions could compromise our information or our players' information and expose us to liability; and
- our inability to protect our intellectual property and proprietary information could adversely impact our business.

Additional factors that may cause future events and actual results, financial or otherwise, to differ, potentially materially, from those discussed in or implied by the forward-looking statements include the risks and uncertainties discussed in our filings with the Securities and Exchange Commission. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur, and reported results should not be considered as an indication of future performance. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Except as required by law, we undertake no obligation to update any forward-looking statements for any reason to conform these statements to actual results or to changes in our expectations.

**Non-GAAP Financial Measures**

Adjusted EBITDA is a non-GAAP financial measure and should not be construed as an alternative to net income as an indicator of operating performance, nor as an alternative to cash flow provided by operating activities as a measure of liquidity, or any other performance measure in each case as determined in accordance with GAAP.

Below is a reconciliation of Adjusted EBITDA to net income, the closest GAAP financial measure. We define Adjusted EBITDA as net income before (i) interest expense, (ii) interest income, (iii) provision for income taxes, (iv) depreciation and amortization expense, (v) stock-based compensation, (vi) contingent consideration, (vii) acquisition and related expenses, (viii) expense under our long-term compensation plans, (ix) M&A related retention payments, and (x) certain other items, including impairments. We calculate Adjusted EBITDA Margin as Adjusted EBITDA divided by revenues.

We supplementally present Adjusted EBITDA and Adjusted EBITDA Margin because these are key operating measures used by our management to assess our financial performance. Adjusted EBITDA adjusts for items that we believe do not reflect the ongoing operating performance of our business, such as certain noncash items, unusual or infrequent items or items that change from period to period without any material relevance to our operating performance. Management believes Adjusted EBITDA and Adjusted EBITDA Margin are useful to investors and analysts in highlighting trends in our operating performance, while other measures can differ significantly depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which we operate and capital investments. Management uses Adjusted EBITDA and Adjusted EBITDA Margin to supplement GAAP measures of performance in the evaluation of the effectiveness of our business strategies, to make budgeting decisions, and to compare our performance against other peer companies using similar measures. We evaluate Adjusted EBITDA and Adjusted EBITDA Margin in conjunction with our results according to GAAP because we believe they provide investors and analysts a more complete understanding of factors and trends affecting our business than GAAP measures alone.

Adjusted EBITDA and Adjusted EBITDA Margin as calculated herein may not be comparable to similarly titled measures reported by other companies within the industry and are not determined in accordance with GAAP. Our presentation of Adjusted EBITDA and Adjusted EBITDA Margin should not be construed as an inference that our future results will be unaffected by unusual or unexpected items.
